ThinDesk / TELUS wins GOLD at CDN Channel Elite Awards

Mississauga, Ontario, October 13, 2009 – ThinDesk, a Thin Client Managed Desktop solution hosted in World-Class TELUS data centre, has won the Gold award for “Best Small Business Solution” at the 2009 CDN Channel Elite Awards. The event, now in its seventh year, is hosted by Computer Dealer News (CDN), Canada’s leading IT channel publication. Winners were announced on September 30th at the national award ceremony in Woodbridge, Ontario.

ThinDesk/TELUS’s winning entry focused on its relationship with Greenferd, a Toronto-based Construction Firm. As an example of the important role that can be provided by an IT solution provider, ThinDesk’s solution improved data security, reduced total cost of ownership, 15% reduction in utility costs, and a projected 100% payback in just 2 years saving the Controller 8 hours per week that was previously devoted to IT management. “I’m very happy to be working with ThinDesk. They always have their clients’ best interest at the fore.” Heather McKelvie, Controller, Greenferd Construction.

Scott Martin, ThinDesk’s Director of Sales says: “We are extremely proud to accept this award, because it represents everything ThinDesk stands for: bringing enterprise-class security and service to small and medium businesses at a fraction of the cost of managing IT on their own.”

About ThinDesk

ThinDesk Inc is a private Canadian company that delivers a totally managed thin computing service for SMB’s. ThinDesk supports entire IT environments, from the desktop to the back office, across wide area networks and the Internet – for all company locations, and mobile workers. ThinDesk’s thin computing platform is hosted by TELUS delivering enterprise-class reliability, security and support with an Always On Guarantee 24/7.
